

MARKETING DATA VISUALIZATION PROJECT REPORT

Title

Marketing Data Visualization and Performance Analysis for a Local Catering Business

1. Introduction

Marketing Data Visualization is the process of presenting marketing metrics through charts, graphs, and dashboards to help businesses understand customer behavior and campaign performance.

This project analyzes marketing data from a catering business in Coimbatore and visualizes key performance indicators (KPIs) to support data-driven decision-making.

2. Objectives

- Collect marketing performance data.
- Analyze customer engagement metrics.
- Visualize campaign performance.
- Identify trends and opportunities.
- Provide recommendations for marketing improvement.

3. Business Overview

Business Name: ABC Catering Services

Location: Coimbatore, Tamil Nadu

Industry: Catering Services

Marketing Channels:

- Website
- Google Business Profile
- Facebook
- Instagram
- WhatsApp Marketing

4. Tools Used

- Microsoft Excel
- Google Sheets

- Google Analytics
- Google Looker Studio
- Canva
- Power BI (Optional)

5. Marketing Data Collected

Channel	Visits/Reach
Website	4500
Google Business Profile	3200
Facebook	2800
Instagram	4100

```

Findings

- Website generated the highest traffic.
- Instagram showed strong customer engagement.
- WhatsApp campaigns had lower reach but higher response rates.

7. Lead Generation Analysis

Source	Leads Generated
Website	120
Google Business	95
Facebook	60
Instagram	85
WhatsApp	40

Observations

- Website generated the most leads.

- Google Business Profile contributed significantly to local inquiries.

8. Social Media Engagement

Platform	Engagement Rate
Facebook	4.5%
Instagram	7.2%
WhatsApp	10.5%

Findings

- Instagram content received higher engagement.
- WhatsApp marketing achieved the highest response rate.

9. Conversion Analysis

Channel	Conversion Rate
Website	5.2%
Google Business	4.8%
Facebook	2.5%
Instagram	3.8%
WhatsApp	6.0%

10. Key Insights

- Website and Google Business Profile are the strongest lead sources.
- Instagram is the most engaging social platform.
- WhatsApp campaigns produce the highest conversion rates.
- Local SEO can further improve website traffic.

11. Recommendations

Short-Term

1. Increase Instagram posting frequency.
2. Optimize Google Business Profile.
3. Improve website landing pages.
4. Run targeted WhatsApp campaigns.

Long-Term

1. Create a marketing dashboard.
2. Implement email marketing automation.
3. Improve local SEO.
4. Track conversions through Google Analytics.

12. Expected Benefits

- Better understanding of marketing performance.
- Improved decision-making.
- Increased lead generation.
- Higher return on marketing investment.

13. Conclusion

Marketing Data Visualization helps businesses transform raw marketing data into meaningful insights. Through visual analysis, businesses can identify successful marketing channels, optimize campaigns, and improve customer acquisition strategies.
